

Software Testing

Module 4

Module-End Assignment:

“Automation Testing”

Q1: Verify the page title of the Registration page: <https://practice.qabrain.com/registration>

Expected Output: Page Title = "QA Practice Site"

Pogram:

```
package ModuleEndAssi;
```

```
import java.time.Duration;
```

```
import org.openqa.selenium.WebDriver;
```

```
import org.openqa.selenium.chrome.ChromeDriver;
```

```
import org.openqa.selenium.support.ui.ExpectedConditions;
```

```
import org.openqa.selenium.support.ui.WebDriverWait;
```

```
public class RetrievePageTitle {
```

```
    public static void main(String[] args) {
```

```
        WebDriver driver = new ChromeDriver();
```

```
        driver.manage().window().maximize();
```

```
        driver.get("https://practice.qabrain.com/registration");
```

```
        WebDriverWait wait = new WebDriverWait(driver, Duration.ofSeconds(10));
```

```
        wait.until(ExpectedConditions.visibilityOfAllElementsLocatedBy(By.tagName("input"
    )));
```

```
        String actualTitle = driver.getTitle();
```

```
        String expectedTitle = "QA Practice Site";
```

```
        if(actualTitle.equals(expectedTitle)) {  
  
            System.out.println("Page Title = " + expectedTitle);}   
        else {  
  
            System.out.println("Title Validation Failed");  
  
        }  
    }  
}
```

Output:

Page Title = QA Practice Site

Q2: Validate the presence of form fields and sign up button on the registration form:

<https://practice.qabrain.com/registration>

Program:

```
package ModuleEndAssi;

import java.time.Duration;

import java.util.HashMap;

import java.util.Map;

import org.openqa.selenium.By;

import org.openqa.selenium.WebDriver;

import org.openqa.selenium.chrome.ChromeDriver;

import org.openqa.selenium.support.ui.ExpectedConditions;

import org.openqa.selenium.support.ui.WebDriverWait;

public class RegistrationForm {

    public static Map<String, Boolean> verifyElements() {

        WebDriver driver = new ChromeDriver();

        Map<String, Boolean> map = new HashMap<>();

        try {

            driver.manage().window().maximize();

            driver.get("https://practice.qabrain.com/registration");

            WebDriverWait wait = new WebDriverWait(driver, Duration.ofSeconds(10));

            wait.until(ExpectedConditions.visibilityOfAllElementsLocatedBy(By.tagName("input")));

            map.put("\nNameField", driver.findElement(By.id("name")).isDisplayed());

            map.put("\nCountry", driver.findElement(By.id("country")).isDisplayed());

            map.put("\nAccountType", driver.findElement(By.id("account")).isDisplayed());

            map.put("\nEmailField", driver.findElement(By.id("email")).isDisplayed());

            map.put("\nPasswordField", driver.findElement(By.id("password")).isDisplayed());

            map.put("\nConfirmPasswordField", driver.findElement(By.id("confirm_password")).isDisplayed());

        } catch (Exception e) {

            e.printStackTrace();

        }

        return map;

    }

}
```

```
yed());
map.put("\nSignUpButton",driver.findElement(By.cssSelector("button[type='submit']")).isDisplayed());

    return map;

} finally {

    driver.quit();

}
```

Output:

```
{
NameField=true,
ConfirmPasswordField=true,
Country=true,
AccountType=true,
SignUpButton=true,
PasswordField=true,
EmailField=true}
```

Q3: Automate the registration form submission: <https://practice.qabrain.com/registration>

Program:

```
package ModuleEndAssi;

import java.time.Duration;
import org.openqa.selenium.By;
import org.openqa.selenium.WebDriver;
import org.openqa.selenium.WebElement;
import org.openqa.selenium.chrome.ChromeDriver;
import org.openqa.selenium.support.ui.ExpectedConditions;
import org.openqa.selenium.support.ui.Select;
import org.openqa.selenium.support.ui.WebDriverWait;

public class FormFill {

    public static void main(String[] args) {

        WebDriver driver = new ChromeDriver();
        driver.manage().window().maximize();
        driver.get("https://practice.qabrain.com/registration");
        WebDriverWait wait = new WebDriverWait(driver, Duration.ofSeconds(10));

        wait.until(ExpectedConditions.visibilityOfAllElementsLocatedBy(By.xpath("//span[te
xt()='Registration']"))));

        driver.findElement(By.cssSelector("#name")).sendKeys("Aiswarya");
        WebElement Element1 = driver.findElement(By.cssSelector("#country"));
        Select slt1 = new Select(Element1);
        slt1.selectByVisibleText("India");
        WebElement Element2 = driver.findElement(By.cssSelector("#account"));
        Select slt2 = new Select(Element2);
        slt2.selectByVisibleText("Engineer");

        driver.findElement(By.cssSelector("#email")).sendKeys("aiswarya123@gmail.com");
```

```
        driver.findElement(By.cssSelector("#password")).sendKeys("psw123");
    driver.findElement(By.cssSelector("#confirm_password")).sendKeys("psw123");
    driver.findElement(By.cssSelector("button[data-slot='button']")).click();
    wait.until(ExpectedConditions.urlContains("registered=true"));
    String link = driver.getCurrentUrl();
    System.out.println("Redirected URL : " + link);
    }
}
```

Output:

Redirected URL : <https://practice.qabrain.com/registration?registered=true>
